SUMMARY

Detail-oriented software engineer with strong expertise in Python, C, and database systems, and hands-on experience building end-to-end applications such as an invoice and analytics platform. Skilled in designing application logic, managing data workflows, and implementing reliable features with a focus on correctness and usability. Known for practical problem-solving, rapid learning, and the ability to translate real-world requirements into scalable, maintainable software solutions while working effectively in collaborative environments.

TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript, HTML, CSS
 - **Databases/OS:** MySQL, MongoDB, Linux
 - **Tools & Frameworks:** Git, GitHub, Tkinter, Django, REST
 - **AI/ML:** Supervised Learning, Unsupervised Learning, NLP
-

PROJECTS

Smart Invoice and Analytics System

Problem : Most invoice management systems require multiple applications for analytics, reporting, and assistance. Smart Invoice & Analytics System eliminates this fragmentation by integrating automated invoicing, an offline AI chatbot, and business analytics within a unified platform.

- Built and trained a custom neural network model using PyTorch to classify and process input patterns.
- Improved accuracy and efficiency of invoice handling, reducing manual input and enabling real-time insights.
- Designed an interactive GUI with CustomTkinter for seamless user experience.

(TECH STACKS: PYTHON, PYTORCH, PANDAS, NUMPY, SQLITE, CUSTOMTKINTER)

Traveler's Diary

Problem : Existing travel platforms focus on content sharing rather than location-driven storytelling. Traveler's Diary bridges this gap through map-integrated travel journals, immersive scrapbook-inspired profiles, multimedia posts, and customizable privacy controls.

- Map-Integrated Travel Journal: Share travel memories through geotagged posts with photos, videos, and interactive maps.

(TECH STACKS: DJANGO, MYSQL, HTML, CSS, JAVASCRIPT)

EDUCATION

- Chendhuran college of engineering and technology
Bachelor of engineering in Computer Science, May 2025
 - Subramanian polytechnic college
Diploma in computer technology, May 2022
-

CERTIFICATES

- JavaEssentials - LinkedIn Learning
- Django-LinkedIn Learning
